

Choose the correct server for your task

If you need Python, then choose the top option

If you need R, then choose the R server

Note that R code cannot be run on a Python server (and vice versa)

Server Options

- ☐ Python: General use (JupyterLab) 5.0.13

- ☐ Python: General use (classic notebook) 5.0.13

- ☒ R: General use (JupyterLab) 5.0.11

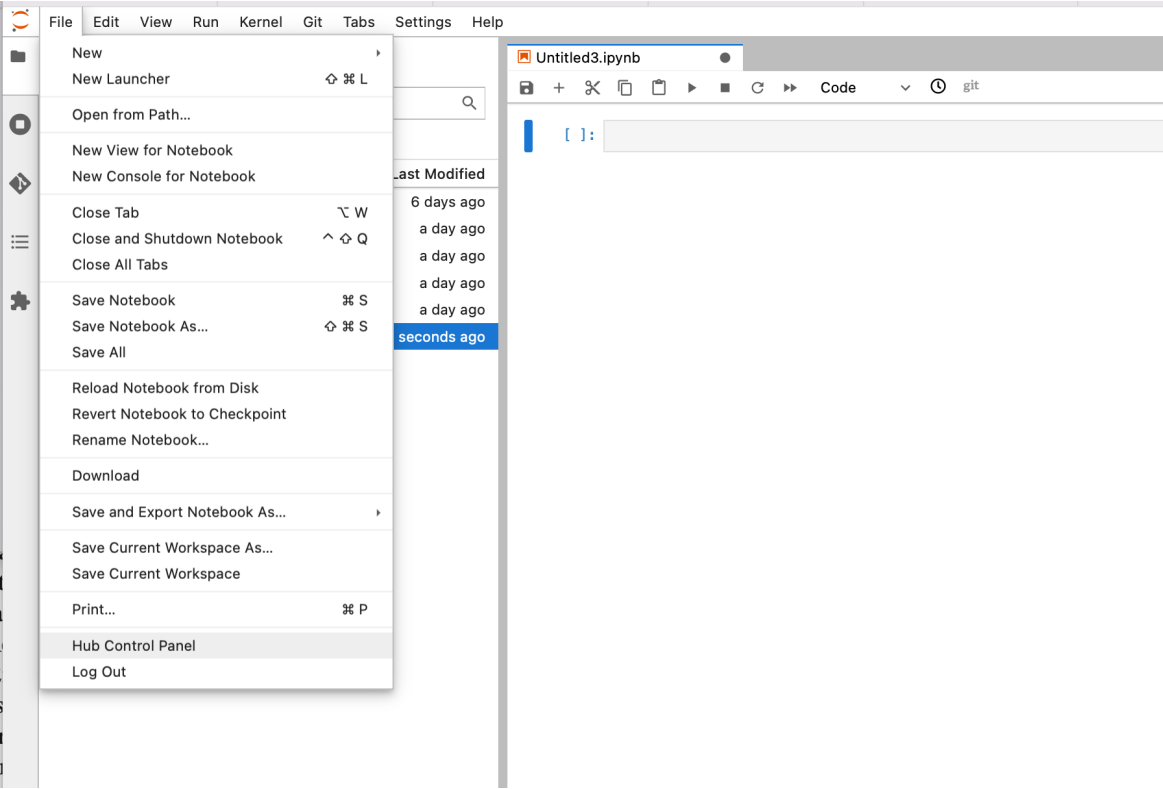

- ☐ Julia: General use (JupyterLab) 5.0.16

- ☐ (testing) Python: General use (JupyterLab)

- ☐ Old version (JupyterLab) 4.1.5

If your server is already running in the web browser, then the landing page will direct to the Notebook

You can get back to the Hub Control Panel by choosing File => Hub Control Panel

Stop My Server

My Server

The currently running server needs to be stopped to switch into a new server
